GENERAL ANSWERS:

1. Retrieve all columns from the PAINTER table.

```
1 SELECT * FROM PAINTER;
```

2. List the title and price of all paintings that cost more than 500.

```
1 SELECT PTNG_TITLE, PTNG_PRICE FROM PAINTING WHERE PTNG_PRICE > 500;
```

3. Retrieve the names (first and last) and phone numbers of all painters from area code '901'.

```
1 SELECT PTR_FIRSTNAME, PTR_LASTNAME, PTR_PHONE FROM PAINTER WHERE PTR_AREACODE = 901;
```

4. Display all paintings assigned to a gallery (i.e., where GAL_NUM is not NULL).

```
1 SELECT * FROM PAINTING WHERE GAL_NUM IS NOT NULL;
```

5. List all painters in descending order by their last name.

```
1 SELECT * FROM PAINTER ORDER BY PTR_LASTNAME DESC;
```

6. Retrieve all paintings that cost more than 500 or are assigned to gallery number '5'.

```
1 SELECT * FROM PAINTING WHERE PTNG_PRICE > 500 OR GAL_NUM = '5';
```

7. Retrieve all paintings that do not belong to gallery number '5'.

```
1 SELECT * FROM PAINTING WHERE GAL_NUM <> '5'
```

```
1 SELECT * FROM PAINTING WHERE GAL_NUM != '5'
```

8. Retrieve all paintings with a price between 500 and 5000.

```
1 SELECT * FROM PAINTING WHERE PTNG_PRICE BETWEEN 500 AND 5000;
```

9. Using the LIKE special operator, retrieve all paintings where the title contains the word 'Rose'.

```
1 SELECT * FROM PAINTING WHERE PTNG_TITLE LIKE '%Rose%';
```

10. Retrieve the most expensive and least expensive painting from the PAINTING table.

```
1 SELECT * FROM PAINTING
2 WHERE PTNG_PRICE = (SELECT MAX(PTNG_PRICE) FROM PAINTING)
3 OR PTNG_PRICE = (SELECT MIN(PTNG_PRICE) FROM PAINTING);
```

11. Retrieve all gallery owners and all painters' last names in a single result set using the UNION operator. Use the alias "Name" for the combined column.

```
1 SELECT GAL_OWNER AS Name FROM GALLERY
2 UNION
3 SELECT PTR_LASTNAME AS Name FROM PAINTER;
```

12. Retrieve all unique gallery area codes from the GALLERY table.

```
1 SELECT DISTINCT GAL_AREACODE FROM GALLERY;
```

13. Insert a new painter into the PAINTER table with the following details:
    PTR_NUM: 130
    PTR_LASTNAME: Eleccion
    PTR_FIRSTNAME: Jhon
    PTR_AREACODE: 702
    PTR_PHONE: 555-7890

```
1 INSERT INTO PAINTER (PTR_NUM, PTR_LASTNAME, PTR_FIRSTNAME, PTR_AREACODE, PTR_PHONE)
2 VALUES (130, 'Eleccion', 'Jhon', 702, '555-7890');
```

14. Create a new table named EXHIBIT with the following columns:
    EXHIBIT_NUM (VARCHAR(4))
    EXHIBIT_NAME (VARCHAR(50))
    EXHIBIT_DATE (DATE)
    GAL_NUM (VARCHAR(4))

```
1 CREATE TABLE EXHIBIT (
2   EXHIBIT_NUM VARCHAR(4),
3   EXHIBIT_NAME VARCHAR(50),
4   EXHIBIT_DATE DATE,
5   GAL_NUM VARCHAR(4)
6 );
```

15. Remove the EXHIBIT table from the database.

```
1 DROP TABLE EXHIBIT;
```

```
1 DROP TABLE IF EXISTS EXHIBIT;
```

CHUA | CORRECT ANSWERS:

TOTAL CORRECT SCORES IN SQL = 24

1. *SELECT * FROM PAINTER;*

2. *SELECT PTNG_TITLE, PTNG_PRICE*
   FROM PAINTING
   WHERE PTNG_PRICE > 500;

3. *SELECT PTR_FIRSTNAME, PTR_LASTNAME, PTR_PHONE*
   FROM PAINTER
   WHERE PTR_AREACODE = 901;
